

YOUR PROJECTOR SCREEN SAVER PLAYER

FlashJester's Entertainer takes your Projector files and plays them as screen savers. As a leading player, Entertainer's interface gives you the freedom to control options such as sound, interaction and even the ability to play a midi file. Use the player for business presentations or for at home entertainment. At the office, Entertainer wears its presentation hat to show off your Projector files without the problem of right click menus disrupting the show. At home (or at work, after hours of course) you can play your favourite Projector files from the Internet. If you design your own screen savers in Flash, you can give them to friends along with a free evaluation copy of Entertainer.

Here's a quick rundown on Entertainer's features:

- Plays any Projector file as a screen saver
- Offers On/Off control of interaction option
- Offers On/Off control of Flash File sound option
- Plays both the Flash music file and midi file OR one at a time
- Plays all PC versions of Flash Projector files
- Changes all Flash Projector files to full screen size automatically
- Works well as presentation tool
- Supports password protection

Entertainer & all FlashJester products support Flash 3/4/5/MX/MX 2004/8 & Windows 95/98/ME/NT/2000/XP
